EDUCATION

Keshav Memorial Institute of Technology, Hyderabad

8.0/10

Bachelors in Computer Science Engineering (AI/ML)

Dec. 2021 – Aug. 2025

- **Courses:** Java, Python, ML, DL, Computer Vision, NLP, GenAI, DSA

Amazon ML Summer School 2024

Virtual

July. 2024

- Immersive learning in Supervised/Unsupervised Learning, DNNs, GenAI, LLMs, and Causal Inference.

EXPERIENCE

Product Engineer

AidenAI

Hyderabad, Telangana, India · On-site

Aug. 2025 – Present

- Leading an 8-member team to build an agentic AI hiring system (MCP + AutoGen), optimizing LLM cost-performance to cut inference costs by 20% while maintaining accuracy.

Product Engineer Intern

AidenAI

Hyderabad, Telangana, India · On-site

Feb. 2025 – Aug. 2025

- Led a 13-member team to deliver a scalable job-matching platform, reducing API latency by 40% via asynchronous FastAPI microservices.
- Deployed LLaMA 8B via Ollama/VLLM; integrated AutoGen agents to auto-apply for jobs, improving match rate by 25%.
- Implemented fine-grained access control with Casbin, reducing security review cycles by 30%.

Full-stack Intern

Procareer Academy

Los Angeles, California, United States · Remote

Mar. 2022 – Aug. 2023

- Built a full-stack platform for coursework delivery and automated assessment, improving grading efficiency by 35%.
- Developed role-based dashboards and integrated secure authentication for 500+ active users.
- Optimized database queries and frontend workflows, reducing average page load time by 25%.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, SQL, HTML, CSS

Frameworks/Tools: Flask, FastAPI, Streamlit, Node.js, Docker, AWS, Ollama, VLLM, AutoGen, MCP

Libraries: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, Transformers, BeautifulSoup

Databases: MySQL, MongoDB

Concepts: REST APIs, Microservices, Agentic AI, Web Scraping, DSA

PROJECTS

Fake News Detection | Selenium, Streamlit, Flask, Transformers, BERT

Jan. 2024 – Apr. 2024

- Built a detection platform using Selenium/BeautifulSoup for data scraping and Google News API for enrichment.
- Implemented Random Forest, Naive Bayes, and BERT for classification, clickbait detection, and similarity assessment.
- Leveraged Transformers for Named Entity Recognition (NER) and subjectivity analysis to enhance context.

Agentic Stock Analysis Framework | Python, Autogen, yfinance

Jul. 2024 – Sep. 2024

- Developed an agentic framework evaluating financial metrics to generate dynamic buy/sell/hold signals.
- Integrated real-time data pipelines and ML-based evaluation strategies for robust signal generation.
- Designed a modular architecture for flexible metric inclusion and validated against historical benchmarks.

CERTIFICATIONS

MathWorks: Deep Learning Onramp, Machine Learning Onramp

Coursera: Neural Networks and Deep Learning
