EDUCATION

Keshav Memorial Institute of Technology, affiliated to JNTUH

8.54/10

B.Tech in Computer Science Engineering (Data Science)

Dec. 2021 – Aug. 2025

Narayana Junior College

97.0%

Intermediate

2019 – 2021

EXPERIENCE

ML Engineer Intern

Risposta

Hyderabad

Sept. 2025 – Present

- Built and deployed RAG pipelines using LangGraph and FastAPI, enabling context-aware document retrieval across large-scale collections with sub-second query latency.
- Developed agentic workflows with specialized tools for query reformulation, retrieval, and response synthesis, improving answer relevance by 30%.
- Integrated BigQuery as a scalable vector store for semantic search over embedded documents, supporting 10K+ indexed entries.

PROJECTS

Medical Transcription Using Speech Recognition | *Python, SpeechRecognition, ML*

Aug. 2024 – Nov. 2024

- Developed an end-to-end speech-to-text pipeline for medical transcription, converting audio recordings into structured clinical notes using Python and SpeechRecognition.
- Applied ML-based post-processing to normalize medical terminology and improve transcription accuracy across multiple clinical specialties.

Multi Organ Segmenter | *CNN, UNet, TensorFlow, Keras*

Dec. 2024 – Feb. 2025

- Engineered a CNN/UNet-based segmentation model for automated multi-organ delineation from CT and MRI scans using TensorFlow and Keras.
- Trained on medical imaging datasets with data augmentation, achieving reliable organ boundary segmentation for clinical analysis workflows.

Personalized News Aggregation & Voice Assistant | *FastAPI, LangGraph, BigQuery, RAG*

Jan. 2025 – Mar. 2025

- Built a retrieval-augmented conversational agent for personalized information retrieval across large document collections using a RAG pipeline with BigQuery vector search.
- Orchestrated multi-step agent workflows via LangGraph with specialized tools for retrieval, query reformulation, and response synthesis, adapting dynamically to user intent.
- Extended into a voice-enabled assistant platform using user preferences and interaction history to guide retrieval and ranking of curated news updates.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frameworks & Tools: FastAPI, LangGraph, TensorFlow, Keras, BigQuery, Git

Libraries: SpeechRecognition, NumPy, Pandas, OpenCV

Concepts: RAG, Agentic AI, Machine Learning, Deep Learning, NLP, Computer Vision

CERTIFICATIONS

Deloitte: Data Analytics Job Simulation

Scaler Topics: Python Certification

Simplilearn: Introduction to Data Analytics
